Métis Traditional Land Use Study
March 20, 2018
Location 315 Ave M South
Session 1 time 2:30
Session 2 time 5:30

CUMFI is gathering Traditional Knowledge (TK) to assess Traditional Land Uses (TLU) for the area affected by Enbridge's activities and to minimize the disturbance to traditional land uses and significant sites. We are also gathering traditional knowledge with the aim of preserving the history of Metis land use across CUMFI's traditional territory.

Traditional knowledge includes your beliefs and values about traditions and practices of your families and local communities with respect to the area identified on the maps. We are asking you to share your stories about how you and your family have used the land.

The traditional knowledge collected will help us identify Metis Traditional Land Uses and how these uses, and the Metis people, may be impacted by developments such as Enbridge's Line 3 Project.

During the two sessions traditional and contemporary land use will be recorded within a 100 km radius of Saskatoon. If you or anyone you know has this knowledge please attend either of the sessions. Refreshments will be provided.

Call 306-975-1006 for further information or to book your session.
